Art Unit: 3632

This is the non-final Office Action for the serial number 10/757,898, FACIA GUARD BRACKET, filed on 1/15/04.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent # 6,336,623 to McCarthy.

McCarthy teaches a bracket (12) comprising a first generally U-shaped recess (figure 6 shows u-shaped recess between element 16 and 12), a fastening member (64) and a second generally U-shaped recess (18) for receiving a guard board. The first generally U-shaped recess having two substantially parallel sides which are directly opposite each other. The bracket includes an extension (the other 18. located near top of the bracket 12) having one or more generally U-shaped recess. The fastening member is a bolt (column 2, line 47). Furthermore, McCarthy teaches plurality of brackets (see figures 1 and 6) secured along the facia board of a roof.

McCarthy teaches the first general U-shaped recess mounted on facia board but fails to teach the first general U-shaped recess receives the facia board. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have placed element 16 underneath the facia board to provide security for the bracket to maintain connected to the facia board.

*Response to Arguments*

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US Patent # 4,666,131 to Kettelkamp, Sr. et al.

Kettelkamp Sr. et al. teaches guard rail mounted on roof.
